

Dove Net Technician Scheduler

New capabilities added to the "Technician Scheduler."

1. We added the Schedule Time to the Listing.
2. We have added Color Capabilities to the Techs. (Press the Color button to assign the colors.)

The screenshot displays the 'Dove Net Technician Scheduler' interface for September 2014. The main window shows a calendar grid with appointment slots. A list of technicians is visible on the right side, including AAA, ACREE, DAVE, DM1, JOHN, LARRY, RICH, TEST, TONY, TONY2, TONY3, TPS2, and WILL. The interface includes a menu bar with options like 'Svc', 'Install', 'List Both', 'Product(s)', 'Group', 'Update From Outlook', 'Purge', 'Color', 'Print/Scn', 'Report', and 'ReList'. A 'Free Techs' list is also present. Annotations highlight several new features: 'Colors' (a button in the top right), 'Available Techs' (two callouts pointing to empty calendar cells), 'Added Time to appointment' (a callout pointing to a slot on September 10th), and 'New Map It Capability' (a callout pointing to a context menu that includes 'Map it', 'Delete', and 'Delete All Selected Days'). The status bar at the bottom shows 'TPSM, 100940XX, Saint Francis Hospital, 9:00 PM More notes 2' and the date 'Monday, September 29, 2014' at '10:01 pm'.

3. When the Show Available Tech (check box is checked) you select a Day, the system will *list the techs that are not assigned for that day.*

4. You can also Map the days appointments.
